url: <http://entter.com>

category: VJ/singer

### **GOTO80+ENTTER media equipment:**

Commodore 64

Nintendo Gameboy

MIDI-Keyboard/Vocoder/Mixer

Microphones

Laptops

## **GOTO80+ENTTER: Project Short Description**

Goto80+Entter VJ live

A wild celebration of retrofuturistic pixels, chip sounds and data aesthetics.

With shows in more than 15 countries, Goto80 is an experienced chip music live-show artist combining purist 8-bit computer skills with singing, screaming and synthesizer-jamming. Since 2003 Goto80 and Entter has collaborated in videos, music, net-art and live-shows with performances in various concerts and festivals alongside artists such as Plaid, DAT Politics, Jason Forrest and Ada. Entter uses their own created software for video jocking and will surprise the audience with a special 3 screen-setup. Their visuals references come from a wide range of sources: old computer visual glitches, hacked software, trash culture from the 1980's, machinima, AI algorithms, arcade machine galleries, cyberpunk and random scripting.
